Post-Op OTC Suggested Medications

The combination of **Ibuprofen (Advil/Motrin)** and **Acetaminophen (Tylenol)** together work well to relieve pain with just a few side effects.

In fact, for many things like dental pain, they work better than many of the opioid-containing pain medications. **(Like Vicodin or Norco)**

1- 500mg **Tylenol** every 6-8 hours

1- 600mg- 800mg **Ibuprofen** every 8 hours
